

WHITLAND
ENGINEERING

Case Study - Utilities

Whitland Engineering completes mechanical installation, pressure testing and commissioning of all plant, pipework, valves, pump stations and access platforms within newly constructed water reservoir at Coed Dolwyd water reservoir Nr Llandudno North Wales.

Whitland Engineering acted as main mechanical contractor to Costain who were Principal Contractor working for Dwr Cymru Welsh Water. The £9m reservoir, holding the equivalent of 10 full Olympic – sized swimming pools will help protect water supplies to 70,000 homes.

The project consisted of the following elements-

- ▶ Design and fabrication of access platforms.
- ▶ Design and installation of pump sets and pipework.
- ▶ Confined space working.
- ▶ On site installation and commissioning of all mechanical plant.
